About UF

The University of Florida (UF) is a major, public, comprehensive, land-grant, research university. The state's oldest and most comprehensive university, UF is among the nation's most academically diverse public universities.

UF has a long history of established programs in international education, research and service. It is one of only 17 public, land-grant universities that belongs to the Association of American Universities.

History

In 1853, the state-funded East Florida Seminary took over the Kingsbury Academy in Ocala. The seminary moved to Gainesville in the 1860s and later was consolidated with the state's land-grant Florida Agricultural College, then in Lake City. In 1905, by legislative action, the college became a university and was moved to Gainesville. Classes first met with 102 students on the present site on Sept. 26, 1906. UF officially opened its doors to women in 1947. With more than 50,000 students, UF is now one of the largest universities in the nation.

Technology Teaching Lab for future teachers takes interactive learning to higher level

How the newly created College of Education Technology Teaching Lab is taking interactive learning to a higher level. The new Technology Teaching Lab is a state-of-the-art facility that will provide a new level of interactive learning for future teachers. The lab is located in the College of Education building and is equipped with the latest technology and resources. The lab will be used for a variety of purposes, including teaching, research, and professional development. The lab is a testament to the College of Education's commitment to providing the highest quality education for its students.

Research

Research is a key component of SKML's mission. Research on and near the island include undergraduate projects, masters and doctoral theses, and faculty research.

Education

We offer education programs for 5th - 12th grade. The University of Florida and Santa Fe College offer both over night field classes and field trip for campus classes. Every summer, UF and SFC offer several multi-day field courses on the island.

Outreach

Public outreach is an important element of SKML's mission. Our programs include island open houses, public lectures, and education programs.

Conservation

Many SKML-affiliated researchers study questions related to conservation and natural resources management. The results from these studies can provide management support and guidance that will help us all protect priceless coastal and marine ecosystems.

Sahel Research Group ▾

Welcome to the website of the Trans-Saharan Elections Project, a project of the University of Florida's [Sahel Research Group](#). TSEP covers elections and the democratic process in a set of six neighboring countries across the Sahel region of Africa. Our goal is to serve as a resource for academics, journalists and policy makers by providing key information on a set of countries that have received far less attention than they deserve. As elsewhere in Africa, these countries had very limited experience with elections during the first three decades of independence (1960-90). Since the early 1990s, however, elections have been central to political discussion and to the search for viable democratic institutions. This website provides information on key aspects of the debates in each of the six countries.

The Trans-Saharan Elections Project was made possible by a generous grant to the University of Florida from the United States Department of State [Bureau of Educational and Cultural Affairs](#). The TSEP website builds on the network of specialists that grew out of the exchanges made possible by that grant, and on the ongoing efforts of the Sahel Research Group. For more information on those exchanges see "About TSEP."

The site has been designed to facilitate comparison both between countries and across thematic areas that are central to contemporary debates about elections in Africa. Beginning your reading by any given country will then allow you to click successively through each relevant theme for that country. Should your interests be thematic, you can also begin your reading with a specific theme, and then click across a discussion of that theme in different countries. You can also switch from French to English versions of the material with a

GRW 6386: Thucydides (Fall 2013)

Time and Location

Wednesday Period 9-11, 2341 Turlington

Course Description

Writing at the height of the Athenian empire and witnessing its precipitous fall, Thucydides has left a subtle and complex account, with which one must first come to terms in any attempt to understand the history of fifth-century Greece. Through a close study of his narrative, this course examines the impact of the Peloponnesian War on the Greek world, with particular emphasis on Thucydides' methods and views, the origin of the war, Periclean strategy, and the growth and collapse of the Athenian empire. In addition to gaining a familiarity with Thucydidean prose, students will consider his writing within the historiographical tradition, ancient and modern.

Required Texts

- H. D. Cameron, ed., *Thucydides Book I: A Student's Grammatical Commentary* (Ann Arbor: University of Michigan, 2003).
- J. S. Rusten, ed., *Thucydides: The Peloponnesian War II* (Cambridge: Cambridge University Press, 1989).

Paragraph  Lead-in                           

Better sound, more presentation tools, and updated equipment planned for the Pugh Hall Ocora.

The proposal submitted by Brad Harwood, CLAS IT, was one of the projects selected for funding this year by the [Technology Fee](#), which supports projects that enhance instructional technology resources. The improvements will help to keep up with increasing technical demands and provide more options for presenters and lecturers invited to UF.

Pugh Hall's Ocora, the building's open central gathering space, has been used to host a number of events with leading lecturers, authors, and famous guest speakers. It is one of the few affordable places on campus open to UF student organization, departments, and colleges for events.

Planned improvements in the proposal include better audio and technical compatibility, better equipment, and more speakers. More sound-absorbant material in the space will reduce reverberation, solving a major problem with the present configuration. More modern and user-friendly multimedia presets and remote diagnostic tools will make it easier for presenters and reduce the need for onsite technicians.

According to Harwood, "With the new system, multimedia can be presented more reliably, with less technical expertise and without compatibility issues."

Things to Consider Before Migrating

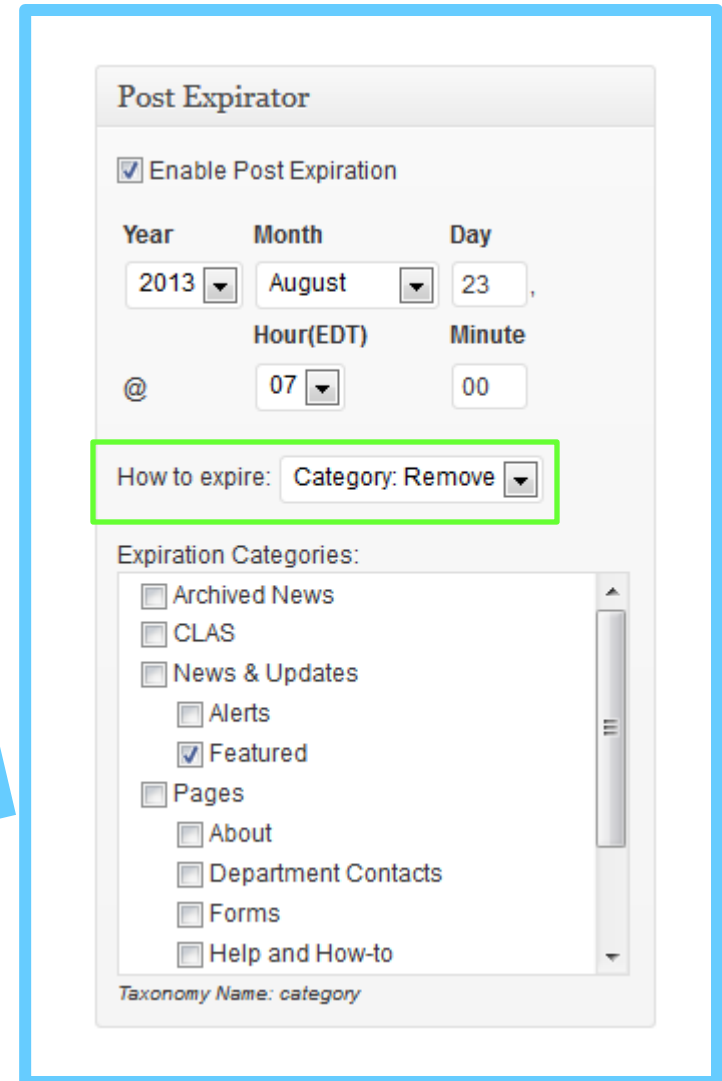

- URLs will change or will require redirects
- Template and layouts are standardized
- Domain name required for department sites
- Everything must be uploaded to new site
- Any sub sites may need to be reorganized
- Have to request new plugins

New Features for Fall 2013

Schedule & Expire News

The screenshot shows the University Writing Program website. At the top, there is a navigation bar with links for Programs, Writing Studio, For Students, For Faculty, Instructor Resources, and People. Below the navigation bar, there is a main content area with a featured article titled "Journal of Undergraduate Research" and a photo of Jamie Lee Marks. A blue arrow points from the "Upcoming Events" section at the bottom right of the website to the "Post Expirator" settings panel on the right.

The "Post Expirator" settings panel is shown. It includes a checkbox for "Enable Post Expiration" which is checked. Below this, there are date and time selection fields: Year (2013), Month (August), Day (23), Hour(EDT) (07), and Minute (00). A green box highlights the "How to expire:" dropdown menu, which is currently set to "Category: Remove". Below this, there is a list of "Expiration Categories" with checkboxes: Archived News, CLAS, News & Updates (with sub-items Alerts and Featured), Pages (with sub-items About, Department Contacts, Forms, and Help and How-to). At the bottom, the "Taxonomy Name:" is set to "category".

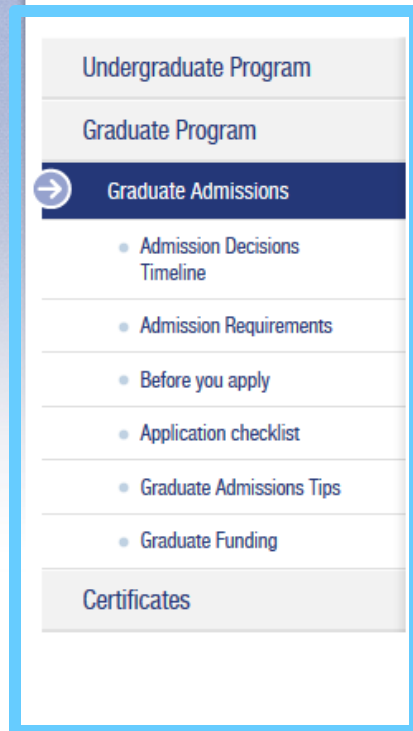

Page Management

The screenshot displays a web application interface for page management. The main content is organized into a tree view under the heading "Programs".

The "Graduate Funding" item is highlighted with a red border, and the "Conferences" section is highlighted with a blue border.

Page Management

Graduate Admissions

Welcome!

We are glad that you have chosen to apply to our graduate program. You should find the information you need for the application process on these pages **AND** through the University Admissions Office and Graduate School pages. Please review all information carefully. *We assume you have reviewed all this information before you contact us with questions.* Note that this is the only page containing current information on our application procedures.

Deadline for Applications: We only admit students for the Fall semester

- **January 31** – All application materials must be received by the Geography Department in order to be considered for funding. Applications are still accepted after this time, but funding decisions will have been made and so the likelihood of funding decreases significantly.
- **April 15** – After this date, your application will not be reviewed in a timely manner as the Admissions Committee does not meet during the summer.
- **June 15** – Final deadline for international students.
- **July 15** – Final deadline for domestic students.

Applications to Graduate School at UF are processed both by the Admissions Office and the Department to which you are applying. The Office of Admissions and Graduate School have sets of requirements for admission. **The Department of Geography has its own set of requirements.** Geography has the right to require application materials in addition to those required by the University or that are different from other departments.

Amharic Studies

About Amharic

Amharic is a Semitic language spoken in North Central Ethiopia by the Amhara. It is the second most-spoken Semitic language in the world, after Arabic, and the official working language of the Federal Democratic Republic of Ethiopia.

Mission

French is an official language of over forty countries and is the first or second language of over two hundred million people worldwide. Our program in French strives to connect students at the University of Florida with these people and places, providing them access to the cultural and professional possibilities of today's global reality.
